Case Study: Healthlands

Outline

Healthlands suppliers Multiservices Ltd required a new fitness audio system for their Healthlands clients across the Midlands. They had used a wired system and approached CGA about an upgrade to full wireless operation.

Challenges

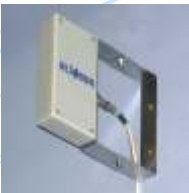

Security, ease of operation, wireless audio and long term reliability were all specified by Multiservices. For busy gyms, good rechargeable battery life is also crucial.

Additionally radio signal could be restricted by the building.
Ease of use and training by busy staff was another factor affecting system specification.

Technical

The Audeon system was specified, supplying 6 channels (upgradeable to 8), rugged units with simple controls, good battery life, security key release and easy remote charging panel. Once installed, the system worked throughout the gym from the outset time and the initial installation of 48 units in Wolverhampton was swiftly followed by further orders.

Comment

Mike Leaver of Multiservices Ltd: "CGA Integration were very efficient and supplied us with best product and service we needed for our customers. We'll have no hesitation using them again for the gyms we're rolling out over the next year".
